Abstract
Foreword to the English edition

Introduction

1. Ground stone blades as means of social and technical reproduction
   A history of Irian Jaya in the global economy
   Raw material determinism
   Axes and adzes
   Variability of hafting forms
   Stone blades, at the heart of social reproduction
   Stone blades as anthropomorphic symbols of the realm of men
2. The Yeleme quarries (Kp. Paniai) et the ground stone blades of Central Irian Jaya
   Rocks from the upper Ye-I River
   The Wang-Kob-Me quarry
   The Brahire quarry in Ye-Ineri
   Blocks from the bed of the Ye-I River
   From roughout to axe in Wano country
   The Axe Trail
   Accessing roughouts: the Yamo Dani perspective
   From roughout to axe among the Yamo Dani

The expansion of the Western Dani and the acceleration of exchanges
The Baliem and the realm of adzes
Axes and adzes, the prestige of stone blades
Partners and strangers: the limitations of exchanges

3. Material and social techniques of the Dani: black rocks and greenschists
The black rocks of Gomburu (Kp. Paniai)
The black rocks of Tagi (Kp. Jayawijaya)
Black rock axes and sacred objects
The quarries of Awigobi and greenschist blades
Ye-yao, the exchange axes

4. Adzes of the Eastern Highlands (Kp. Jayawijaya)
From rock to adze in Langda
Exploiting rocks from the river
A production controlled by specialists
The learning process
Grinding and hafting
Exchanges and diffusion
Stone blade production in the Phu Valley and the westward expansion of adzes
The archaeological sites of Koropun
Yamyhl, Red Digul and the Seashell Trail

5. Ormu-Wari and the Lowlands axes
The Mumugo Valley and schist axes
Ormu and the marriage axes
Quarrying context in the Cyclops Mountains
Knapping and pecking
Grinding and varnishing
Technical and social production in Ormu
Village specialization and exchanges

6. The ground stone blades of Irian Jaya, a synthesis
A shared background: the balance between natural environment, modes of subsistence and population density
Rocks and types of sources

Quarry access and the social context of quarrying
Quarrying techniques
Duration of the quarrying events
From rock to ground stone blade: segmentation of the *chaîne opératoire*
Shaping roughouts: raw material determinism
Manufacture and specialization
Grinding and grinding stones
Axes and adzes
Degree of grinding
Length of the stone blades
Handles for felling tools
Circulation of the blades
Stone blades for the living

7. Postface
Metal versus stone
Ceramic techniques and acculturation processes
Supernatural beings and cannibalistic cuisine
Gifting signs
